Special volume 'Lexical acquisition', edited by Lila Gleitman and Barbara Landau

Preface (L. Gleitman and B. Landau) 1

Section 1: Nature of the mental lexicon

E. Williams, Remarks on lexical knowledge 7

B. Levin and M. Rappaport Hovav, A preliminary analysis of causative verbs in English 35

Section 2: Discovering the word units

A. Cutler, Segmentation problems, rhythmic solutions 81

M.H. Kelly and S. Martin, Domain-general abilities applied to domain-specific tasks: Sensitivity to probabilities in perception, cognition, and language 105

Section 3: Categorizing the world

S. Carey, Does learning a language require the child to reconceptualize the world? 143

F.C. Keil, Explanation, association, and the acquisition of word meaning 169

Section 4: Categories, words, and language

E.M. Markman, Constraints on word meaning in early language acquisition 199

S.R. Waxman, The development of an appreciation of specific linkages between linguistic and conceptual organization 229

B. Landau, Where's what and what's where: The language of objects in space 259
P. Bloom, Possible names: The role of syntax-semantics mappings in the acquisition of nominals 297

Section 5: The case of verbs

C. Fisher, D.G. Hall, S. Rakowitz and L. Gleitman, When it is better to receive than to give: Syntactic and conceptual constraints on vocabulary growth 333
S. Pinker, How could a child use verb syntax to learn verb semantics? 377
J. Grimshaw, Lexical reconciliation 411

Section 6: Procedures for verb learning

M.R. Brent, Surface cues and robust inference as a basis for the early acquisition of subcategorization frames 433
M. Steedman, Acquisition of verb categories 471
